SMALL WONDERS PLAY SCHOOL, BANDLAGUDA JAGIR, HYDERABAD.

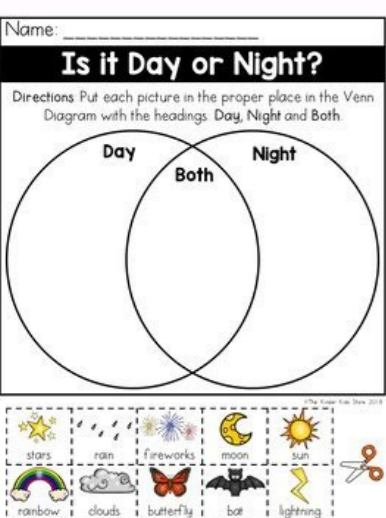

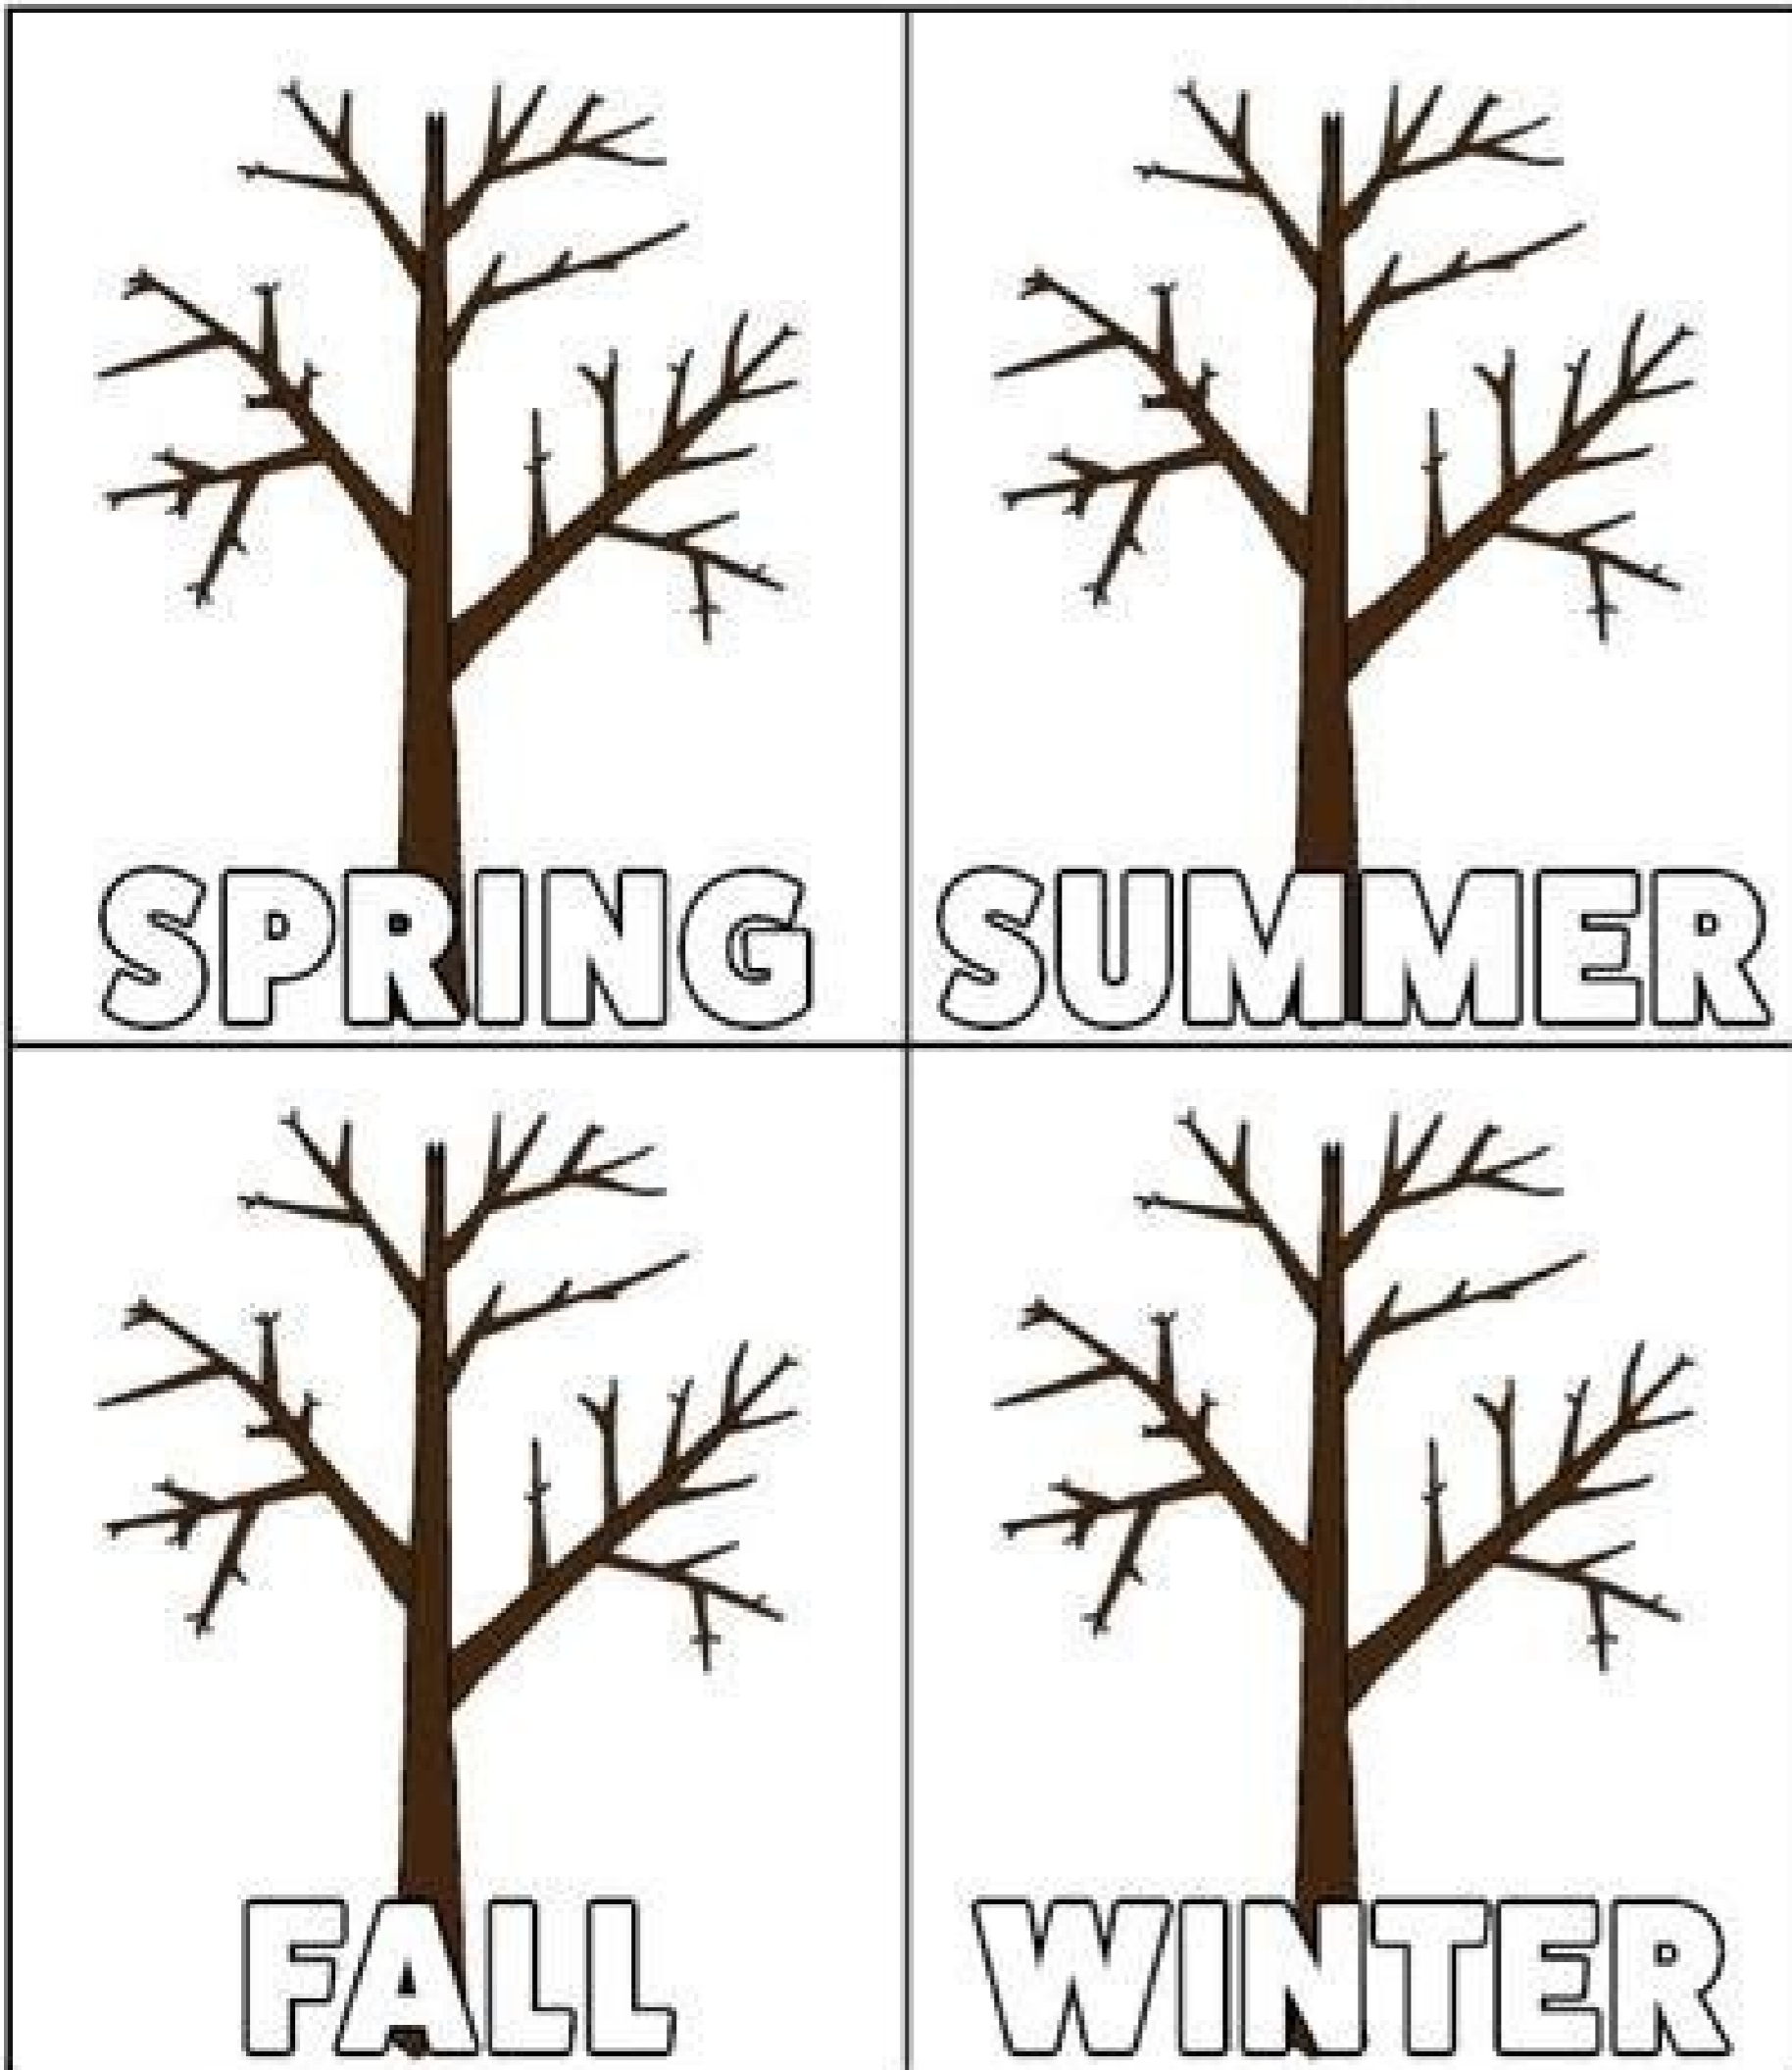

Name :	Class : PP 2
www.smallwondersplayschool.com	Concept : Number Readiness
Batch : 2020-2021	Topic : Sorting

Match the toys inside with the same toys outside

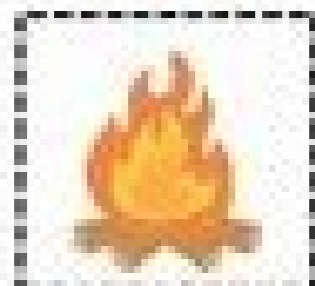

Name : _____

Color the trees and words for each season.

Sort

Hot	Cold

These worksheets provide some practice sorting items into groups; practice offline with real life objects (coins, utensils, etc.) is recommended. Practicing sorting the same items by different characteristics is also good (e.g., first sort by size, then by color). Children of all ages benefit from sorting. Whether young children are sorting two items into piles or an older child is sorting vocabulary by different characteristics, sorting is stimulating the brain. It is a great activity to develop an important skill. Comparing, contrasting, and grouping while children are sorting positively impacts logical thinking skills and mathematical concepts. Here's a huge collection of our favorite sorting activities. Just download, print, and sort. Color Sorting Activities You can encourage your busy toddler to sort anything by color. Things you have on hand at home are perfect such as: blocks pom poms toys (cars, stuffed animals, play food) clothes stickers pipe cleaners dot stickers crayons Sort the items onto matching colored construction paper or onto paper plates with the color in the middle of each one. Another great idea is to sort beads by color into cupcake liners. This is a fun way to develop fine motor skills. For extra practice here are several free, printable color sorting activities: Shape Sorting Activities Sorting things by shape provides the extra challenge of identifying shapes and their characteristics. If you have a shape sorter at home, use it to talk about the different shapes and how they feel and look and the different attributes of each shape. Then use it as a sorting activity. Here is a collection of free, printable shape sorting activities: Math Sorting Activities Working with numbers that are represented in different ways is a challenge that is extremely beneficial for number sense and subitizing. These early math skills help develop a solid foundation. Here's a great collection of free, printable number cards that you can use for sorting: Letter Sorting Activities While children are experimenting with letter identification and phonics concepts, sorting helps them find patterns and categorize information. Sort with magnetic letters when your child is sorting letters for the first time. Here are several free, printable sorting activities: Beginning Reading Sorting Activities Sorting words by word families, parts of speech, or prefixes/suffixes helps to deepen vocabulary and improve reading and spelling fluency. Science Sorting Activities Even in subjects like Science and Social Studies, sorting is a fundamental skill that helps the brain make connections and organize new information We hope that you will find this great resource helpful for your early childhood classroom or at home with your children. With sorting being such a beneficial activity, use these resources and get started today! Elevate math thinking in your kids with these wonderful sorting and classifying worksheets for first grade. Children always have an immense desire to arrange, create order and make sense of their real world. To this light, our grade 1 printable sorting activities consist of outstanding sorting, ordering and classifying activities: numbers and shapes. Sorting, ordering and classifying concepts form the basis of advanced math skills: geometry, pattern recognition and Venn diagrams. In an effort to improve kid's logical reasoning and spatial sense skill, one of our grade 1 printable sorting activities - Venn diagram will be of great importance to kids. The fun display of bright and colorful shapes in this Venn diagram activity will demonstrate clearly to kids that "a set consist of a number of objects different from the other set, whereas both sets can still have combined elements". Moreover, to boast of your kids natural growth and development, don't hesitate to engage your kids in these fantastic worksheets. Here, they will develop an excellent visual processing and spatial awareness skill in an endeavor to determine which particular shapes or colors belong to one set "only" or both sets. Knowing how numbers and objects are related to each other is of great importance to kid's understanding of number concepts. To clearly demonstrate how numbers relate to each other our sorting, ordering and classifying activities encompasses putting numbers in order, in relation to "greatest" or "least". Hence, reinforcing the concept of greater than (>) and less than (<)
